

Shipping Information

Living stocks and supplies are typically shipped by FedEx unless a user requests an alternative method. By request, AGSC staff can charge shipping costs directly to a user's FedEx account.

All shipments to destinations outside of the United States require a special [CITES](#) permit because of the status of axolotls on the Endangered Species List (Appendix 2). Some countries may require an import permit as well so contact your country's CITES Management Authority to determine local requirements. Please anticipate that it will take several months to obtain all permits and permissions before receiving axolotls, plan accordingly.

International Shipments

AGSC uses Avico International to assist with international shipments. This freight forwarding company acts as AGSC's agent in New York (the port of export) to make sure that packages are inspected and processed in a timely manner.
