IMPORTANT NOTICE

TO: Users (or potential users) of the Post Office Express Mail/Special Delivery shipments of axolotl material from the I. U. Axolotl Colony

If this type of shipment is useful to you and you would like us to continue shipping material to you via the Post Office, it is important that you reimburse us for the shipping expense at your earliest convenience. The I.U. Biology Department permits us to pay the Post Office out of a special Axolotl Colony Shipping Fund. Unfortunately this Fund has well defined limits.

Post Office shipments are generally less expensive than Air Freight shipments. By using light-weight bait boxes we have had good success with mailing embryos and small larvae direct to researchers.

Thus, this Post Office type of shipment may be of considerable advantage to many laboratories. Please help us continue this service by keeping our shipment fund solvent. Please provide prompt reimbursements.

Thank you!
