

BIOTECTONICS

The cinnamon continent,
skimming
 across a world's
 ivory ocean,
gathers itself
 in
 to the hot yolk.

A moony-round Möbius--
 Bottle afloat
 in luminous
 plasma,
the planet
Axolotl hatches itself!

Ted Weiant

EDITOR'S NOTE: The Axolotl Colony is collecting poems, rhymes and riddles about axolotls. We plan to publish them in next year's spring issue, and would be delighted to receive contributions from our readers.
