Availability of Experimental Material, F. Bacher and N. Montoya.....	1
Bibliography of Recent Research on Axolotls L. Lawrence and P. Riesenman.....	3
Axolotl Recipes, R. Brandon.....	24
More Cartoons.....	25

## Editor's Note

The next issue will contain information about disease control in amphibians. Although the primary focus will be the axolotl, contributions dealing with other laboratory amphibia will be welcome. Please submit copy by March, 1980. Since a substantial dearth of information on this topic exists, we plan to include preliminary reports which will be designed to stimulate further interest in this topic. Readers should feel encouraged to submit contributions which deal with descriptions of disease syndromes and/or treatments for common diseases.
