Exit Laughing

Field and Stream ..... 31

Editor's Note

The I.U. Axolotl Colony continues to supply an increasing number of outside laboratories with experimental material. Craig Watson (Project Supervisor) and Susan Duhon (Embryologist) are responsible for the day-to-day operation of the Colony. Francoise Briggs is presently on a leave of absence. Telephone inquiries to either Craig or Susan at (812) 335-8260 are always welcome.
