

In Search of Axolotl Tumors?

Bob Barnes, Central Valley Biological Supply, maintains individuals with the following tumors:

- a. tumor growing on flank of white axolotl host.
- b. tumor growing on shoulder of black axolotl host.
- c. tumor growing on flank of black axolotl host.
Please contact Mr. Barnes if interested.

The I.U. Axolotl Colony has a golden albino (a/a D/-) individual in its collection with a tumor on right lower jaw.

Please contact the Colony if you would like to use that tumor in a research program.

Call for Information on Crowding

Dr. Craig Nelson, Department of Biology, Indiana University, Bloomington, IN 47405 would like information (eg. literature citations) on the subject of the effects of crowding (high population density) on larval amphibians.
