

AXOLOTL NEWS

IU Axolotl Colony 2002 Price List

Axolotls are available to qualified researchers or instructors. Please register with the Axolotl Colony before requesting embryos larvae, juveniles, or adults (<http://www.indiana.edu/~axolotl/colony/obtain.html>). Orders can be placed via email (axolotl@indiana.edu) or phone (812-855-8260) or fax (812-855-6705). Email and fax are the most reliable since we cannot always get to the phone.

Embryos

Genotype	Price
normals, wildtype, and albinos (a/a)	\$35 per 100 embryos or fraction thereof
white (d/d), melanoid (m/m), axanthic (ax/ax)	\$50 per 100 embryos or fraction thereof
eyeless (+/e X +/e), cardiac (+/c X +/c), short toes (+/s X +/s), and other specific gene crosses	\$50 per 100 embryos or fraction thereof

Darkly pigmented embryos are sorted at blastula. Albino embryos are NOT sorted, viability varies.

Larvae and Juveniles

Phenotype	Size Range**	Cost per Animal (\$)
normals and wildtype	hatchlings	0.35
	2-3 cm larvae	0.75
	3-5 cm larvae	2.50
	5-8 cm juveniles	8.50
	8-12 cm juveniles	12.00
	subadults	16.00
white (d/d), albino (a/a), melanoid (m/m), axanthic, (ax/ax)	hatchlings	0.50
	2-3 cm larvae	1.00
	3-5 cm larvae	3.00
	5-8 cm juveniles	10.00
	8-12 cm juveniles	15.00
	subadults	18.00

**All sizes may not be available. Call or e-mail to find out current availability. In some cases when space allows, animals can be raised to fill orders placed in advance.

Adults

Type	Phenotype	Price per Animal(\$)	
		Female	Male
Healthy, Non-breeding	all phenotypes	20	20
Breeders (ask about availability)	all phenotypes	30	25

Pellet Food

(Larvae (5cm+), Juveniles and Adults)

Food Size	Price per Bag (~1/2 pound)
Large - 5 mm	\$3
Small - 3 mm	\$3

Information: Calculated Analysis: Protein.....44%; Fat.....18%; Fiber.....5%; Ash.....8%. Ingredients: Fish Meal, Wheat Feed Flour, Blood Meal, Fish Oil, Ascorbic Acid, Biotin, Choline Chloride, Folic Acid, Niacin, Pantothenic Acid (d-calcium pantothenate), Pyridoxine (hydrochloride), Riboflavin, Thiamine (mononitrate), Vitamin B12 supplement, Vitamin A (acetate), Vitamin D (d-activated animal sterol), Vitamin E (dl-alpha tocopheryl acetate), Vitamin K3 (menadione sodium bisulfite complex), Copper Sulfate, Manganese Sulfate, Potassium Iodate, Salt, Zinc, Sulfate, Ethoxyquin (preservative), propionic Acid, Sorbic Acid, Propylene Glycol, Canthaxanthin.

Supplies

Items	Cost (\$)
Larvae/Juvenile bowls (1L plastic)	1.00
Juvenile/Adult Bowls (4L plastic)	1.00
Large Pipettes for embryos (glass)	10.00
